PROJECTS

Car Hub | [Live-site](#) | [Client](#)

Used Technologies – **Next.js, typescript, tailwind, Next-Auth, MongoDB.**

Features-

- A rent-a-car and repair booking website built with Next.js..
- Users can view detailed car information and book them directly from the website.
- A full-stack project that leverages Next.js's built-in server capabilities instead of Express.js.

(Web App)

Sketch Book | [Live-link](#) | [Client](#) | [Server](#)

Used Technologies – **Next.js, Redux, tailwind, Socket-io, Node.js, Express.**

Features-

- Interactive Sketching: Users can create sketches using a variety of colors.
- Save and Share: Users can download their artwork directly from the app.
- Enables multiple users to collaborate on sketches in real-time through Socket.io.

(Freelance Project)

Hasan Dental Care | [Live-link](#) | [Client](#) | [Server](#)

Used Technologies – **React.js, tailwind, Daisy-UI, Node.js, Express.js, MongoDB.**

Features-

- Patients can book appointments by selecting their preferred date and time.
- Separate dashboards for users and admins to manage bookings, appointments efficiently.
- Patients can leave reviews, and they are displayed in a dedicated reviews section.
